## SUMMARY

Information Technology undergraduate at Brawijaya University with 3 years of experience in frontend and backend web development. Skilled in JavaScript-based stacks, API integration, responsive interfaces, state handling, and product iteration. Interested in building maintainable, user-focused products, with a growing focus on AI-powered applications, AI-assisted development, and Web3 application development.

---

## EDUCATION

**Faculty of Computer Science, Brawijaya University**

**Malang**  
2023 - Present

Bachelor of Information Technology | GPA: 3.91 / 4.00

---

## ORGANIZATION

**Eksekutif Mahasiswa Universitas Brawijaya**

**Malang**

**Expert Staff - Communication and Information Center**

March 2025 - Desember 2025

- Served as the frontend developer for the official EM UB website using Next.js, TypeScript, and GraphQL.
  - Built a program registration system with dynamic forms and autosave functionality for a platform used by more than 1,300 users, along with an announcement feature for publishing selection results.
  - Developed reusable UI components, navigation, and interaction flows while mentoring internship staff on SDGs-related web projects through technical guidance and code feedback.
- 

## WORK EXPERIENCE

**Faculty of Computer Science, Brawijaya University**

**Malang**

**Lab Assistant – Web Application Programming**

September 2025 – Desember 2025

- Conducted practicum sessions for 21 students over one semester (≈4 months), delivering materials on HTML, CSS, JavaScript, PHP, and Laravel.
- Reviewed practicum modules, assigned tasks, and assessed student submissions and overall performance.

**PT. Jalin Mayantara Indonesia**

**Malang**

**Frontend Developer Intern**

February 2026 - July 2026

- Developed frontend features for a microservice-based digital education ecosystem, covering student exam flows and an AI-powered learning analysis platform. Worked on exam flow, teacher dashboard, learning analysis detail, pre-test/post-test, onboarding, splash screen, AI-based question generation, and learning insight presentation to support teachers in deciding follow-up actions.
  - Implemented mobile-lock layout, API integration, page state handling, and exam result data mapping to present information such as learning groups, topics that need reinforcement, and learning recommendations clearly.
  - Involved in the feature delivery process from implementation, review, testing, UAT, internal demo, to bug fixing after features were tested or released, while coordinating with designers, backend engineers, and the team leader.
-

## **ACHIEVEMENT**

### **1st Place – Web Design Competition, Teknovistafest, Universitas Airlangga, 2024**

Contributed as a Front-End Developer in a team project called “Kenal Batik”, an interactive web platform introducing Indonesian batik culture with gamification features such as quizzes and experience points (React.js, Tailwind CSS, RESTful API, and React libraries).

---

## **SKILLS**

### **Soft Skills**

Problem Solving, Team Collaboration, Time Management, Adaptability, Continuous Learning

### **Technical Skills**

React.js, Vue.js, Next.js, Typescript, Nuxt, Express.js, Node.js Tailwind CSS, RESTful API, GraphQL, Git
