SUMMARY

Final-year Information Technology student at Brawijaya University with three years of hands-on experience building frontend and backend web applications. Experienced with JavaScript-based stacks, API integration, responsive interfaces, state management, and product iteration across real projects. Focused on building maintainable, user-centered products while exploring AI-powered applications, AI-assisted engineering workflows, and Web3.

EDUCATION

Faculty of Computer Science, Brawijaya University	Malang
<i>Bachelor of Information Technology GPA: 3.91 / 4.00</i>	<i>2023 - Present</i>

ORGANIZATION

Eksekutif Mahasiswa Universitas Brawijaya	Malang
Expert Staff - Communication and Information Center	<i>March 2025 - Desember 2025</i>
- Served as the frontend developer for the official EM UB website using Next.js, TypeScript, and GraphQL. - Built a program registration system with dynamic forms and autosave functionality for a platform used by more than 1,300 users, along with an announcement feature for publishing selection results. - Developed reusable UI components, navigation, and interaction flows while mentoring internship staff on SDGs-related web projects through technical guidance and code feedback.	

WORK EXPERIENCE

Faculty of Computer Science, Brawijaya University	Malang
Lab Assistant – Web Application Programming	<i>September 2025 – Desember 2025</i>
- Conducted practicum sessions for 21 students over one semester (≈4 months), delivering materials on HTML, CSS, JavaScript, PHP, and Laravel. - Reviewed practicum modules, assigned tasks, and assessed student submissions and overall performance.	
PT. Jalin Mayantara Indonesia	Malang
Frontend Developer Intern	<i>February 2026 - July 2026</i>
- Developed frontend features for a microservice-based digital education ecosystem, covering student exam flows and an AI-powered learning analysis platform. Worked on exam flow, teacher dashboard, learning analysis detail, pre-test/post-test, onboarding, splash screen, and learning insight presentation to support teachers in deciding follow-up actions. - Implemented mobile-lock layout, API integration, page state handling, and exam result data mapping to present information such as learning groups, topics that need reinforcement, and learning recommendations clearly. - Involved in the feature delivery process from implementation, review, testing, UAT, internal demo, to bug fixing after features were tested or released, while coordinating with designers, backend engineers, and the team leader.	

ACHIEVEMENT

1st Place – Web Design Competition, Teknovistafest, Universitas Airlangga, 2024

Contributed as a Front-End Developer in a team project called “Kenal Batik”, an interactive web platform introducing Indonesian batik culture with gamification features such as quizzes and experience points (React.js, Tailwind CSS, RESTful API, and React libraries).

SKILLS

Soft Skills

Problem Solving, Team Collaboration, Time Management, Adaptability, Continuous Learning

Technical Skills

React.js, Vue.js, Next.js, Typescript, Nuxt, Express.js, Node.js Tailwind CSS, RESTful API, GraphQL, Git
